***GARAGE***

CUSTOM 2021

So many success stories were born in a garage. Most work days start here, just like your bike rides do. The Garage is the fort, your safe that contains what you have most precious. For this reason, we have decided to call our custom line of clothing for *GARAGE*, inspired by the attention to detail you use in each setting by your eager search for perfection and by taking a cue from that desire to feel unique and exclusive.

*OBBI GARAGE* is dedicated to you and your team. It is designed for all competitive levels and adapts to everybody's size thanks to the different wearability categories like: Skin, Slim and Regular Fit. We use a new pocket-systems on the jerseys and the bib shorts, warp-knit and abrasion-resistant fabrics with maximum breathability and water repellency and quick drying technology together with high-end chamois, raw cuts and the special YKK® zippers with quick opening. Put it all together and you have a truly unique piece of clothing for your bike rides. In addition to our technology-advanced clothing materials, our other forte remains our Neapolitan heritage. Just like you, we know what the word passion really means.

PAD  
ELASTIC INTERFACE

## NICE MAN

- A.** Exclusive cycling pad by Elastic Interface®. Registered design.
- B.** Road and off-road rides
- C.** Extremely flat on the surface and minimalist design for close and continuous skin contact
- D.** Central channel specific for male anatomy
- E.** Improved blood flow and perineal pressure relief
- F.** Medium-density foams and essential profile
- G.** Elastic Interface® sustainable fabric: extremely soft polyamide with a special channel structure that provides great moisture management.

## TIRRENO PLUS MEN

- A.** Exclusive cycling pad by Elastic Interface®. Registered design.
- B.** Road and off-road rides
- C.** Extremely flat on the surface and minimalist design for close and continuous skin contact
- D.** Central channel specific for male anatomy
- E.** Improved blood flow and perineal pressure relief
- F.** Medium-density foams and essential profile
- G.** ECO X-Tract top fabric. Bacteriostatic fabric that inhibits the growth of bacteria while simultaneously maintaining the skin's normal bacterial balance. Prevents skin irritations and rashes caused by sweat. Sustainable and soft, with a special channel structure that helps collect, canalize and expel moisture

## GRAVEL PERFORMANCE MEN

- A.** Exclusive chamois by Elastic Interface®
- B.** Extreme protection and comfort for the longest gravel rides
- C.** Central channel specific for male anatomy. Improved blood flow and pressure relief
- D.** Anatomic shape. Perfect fit and saddle stability
- E.** Short top allows to improve air circulation
- F.** Perforated paddings and foams. Ventilation, lower skin temperature and reduced moisture
- G.** Ultra-high density insert (120kg/m3) for great support while riding on all terrains
- H.** Elastic Interface® ECO X-Fifty fabric: recycled yarns of polyester and polyamide for an exclusive sustainable fabric. REPOC construction. Polyester and Polyamide work on different levels to create a texture with REduced Points of Contact. Soft polyamide on the top, polyester on the lower level for improved moisture management. Bacteriostatic

## ROAD PERFORMANCE PELOTON HYBRID WOMEN

- A.** Cycling pad by Elastic Interface®. Certified Standard 100 by Deko-Text®
- B.** Road uses
- C.** 4 densities. Perfect for extra-long distance rides
- D.** Minimum bulk and great flexibility
- E.** Specific design for women, developed according to anthropometric parameters
- F.** Cutting-edge WP3 design. Intended for those women who are extremely sensitive to compression, with additional relief in the perineal area
- G.** Anatomic construction for perfect fit and saddle stability

- H.** Smooth surface and gradual areas of transition.
- I.** Perforated top for lower skin temperature and reduced moisture
- L.** Hybrid Cell System. 200kg/m<sup>3</sup> density insert to support the cyclist even in the longest rides on a road bike
- M.** Elastic Interface® ECO X-Fifty fabric: recycled yarns of polyester and polyamide for an exclusive sustainable fabric. REPOC construction. Polyester and Polyamide work on different levels to create a texture with REduced Points of Contact. Soft polyamide on the top, polyester on the lower level for improved moisture management. Bacteriostatic
